

Smart Internship & Placement Portal BRD & FRD Document

BUSINESS REQUIREMENTS DOCUMENT (BRD)

1. Project Title

Smart Internship & Placement Portal

2. Project Overview

The Smart Internship & Placement Portal is a web-based application developed to manage internship and placement activities for students, recruiters, and administrators within an organization or educational institution.

3. Business Objective

Digitize the placement process, reduce paperwork, improve placement coordination, and provide centralized student and company management.

4. Target Users

Student, Recruiter, and Placement Officer/Admin.

5. Business Scope

Student registration, recruiter management, job posting, application management, interview scheduling, dashboards, notifications, and reports.

6. Expected Benefits

Faster recruitment workflow, centralized data management, better student engagement, and easy report generation.

7. Success Criteria

Students can apply successfully, recruiters can manage job postings, and admins can monitor placement activities.

FUNCTIONAL REQUIREMENTS DOCUMENT (FRD)

1. Authentication Module

Student login/register, recruiter login/register, admin login, forgot password, reset password, and role-based access.

2. Student Module

Profile management, resume upload, skills management, job applications, interview schedules, and notifications.

3. Recruiter Module

Company profile management, job posting, applicant management, interview scheduling, and selection updates.

4. Admin Module

Manage students, recruiters, companies, reports, placement statistics, and notifications.

5. Job & Internship Management

Create jobs, internship listings, eligibility criteria, search & filters, and application deadlines.

6. Application Management

Application tracking, shortlist status, interview updates, selection/rejection status.

7. Interview Management

Interview scheduling, interview status tracking, online/offline interview management.

8. Notification Module

Application updates, interview alerts, job notifications, and reminders.

9. Reports & Analytics

Placement reports, student reports, company reports, analytics dashboards, and charts.

NON-FUNCTIONAL REQUIREMENTS

Category	Details
Performance	Fast page loading and optimized API calls
Security	JWT Authentication and role-based authorization
Usability	Responsive UI and easy navigation
Compatibility	Chrome, Edge, Firefox, and mobile browsers

TECHNICAL REQUIREMENTS

Layer	Technology
Frontend	React + Vite, Tailwind CSS, Redux Toolkit
Backend	Node.js, Express.js
Database	MongoDB
Optional	Firebase Authentication, Cloudinary

30-DAY PROJECT TIMELINE

Week	Tasks
Week 1	UI Design + Authentication
Week 2	Student & Recruiter Modules
Week 3	Applications + Interview Management
Week 4	Reports, Testing, Deployment
